JOURNAL OF ELECTROANALYTICAL CHEMISTRY

Subject index

Adatom model
Electrochemistry of poly(aniline-*co*-*N*-butylaniline) copolymer: comparison with polyaniline and poly(*N*-butylaniline) (Ye et al.) 71
Adenine
In situ reactivity of the electrochemically generated nitro radical anion from nitrendipine with glutathione, adenine and uracil (Núñez-Vergara et al.) 215
Adsorption
Adsorption behavior of functionalized ferrocenylalkane thiols and disulfide onto Au and ITO and electrochemical properties of modified electrodes: effects of acyl and alkyl groups attached to the ferrocene ring (Kondo et al.) 203
Adsorption of aromatic hydrocarbons on an electrode: a molecular dynamics study (Zhu) 269
Alkali metal cations
Chemical limitations to the anodic dissolution of p-Si in fluoride media in the presence of alkali metal cations (Hassan et al.) 211
Alkanethiol
Kinetic analysis of the enzyme electrode composed of GOx adsorbed on an alkanethiol SAM modified Pt surface (Dong et al.) 195
Anodic dissolution
Chemical limitations to the anodic dissolution of p-Si in fluoride media in the presence of alkali metal cations (Hassan et al.) 211
Anodic oxidation
In situ examination of anodic silver oxide films by EXAFS in the reflection mode (Hecht et al.) 113
Transpassivity of molybdenum in H_2SO_4 solution (Bojinov et al.) 123
Aromatic hydrocarbons
Adsorption of aromatic hydrocarbons on an electrode: a molecular dynamics study (Zhu) 269
Au
Adsorption behavior of functionalized ferrocenylalkane thiols and disulfide onto Au and ITO and electrochemical properties of modified electrodes: effects of acyl and alkyl groups attached to the ferrocene ring (Kondo et al.) 203
Au(100)
Effect of isomeric dicarboxylic anions on the reconstruction phenomena of Au(100) (Skołuda) 265

Bioelectrocatalysis
Bioelectrocatalytic hydroxylation of nicotinic acid at an electrode modified with immobilized bacterial cells of *Pseudomonas fluorescens* in the presence of electron transfer mediators (Takayama et al.) 47
Biosensors
Surface characterization of thin-film platinum electrodes for biosensors by means of cyclic voltammetry and laser SNMS (Aschauer et al.) 143

Carbon dioxide
Atomic arrangement dependence of reduction rates of carbon dioxide on iridium single crystal electrodes (Hoshi et al.) 261
Catalysis
Electro-oxidation of CO and methanol on graphite-based platinum electrodes combined with oxide-supported ultrafine gold particles (Biswas et al.) 167
Cathodic electrodeposition
Cathodic electrodeposition of CdTe on n-type monocrystalline silicon (Sugimoto, Peter) 251
Chemical effects
Chemical limitations to the anodic dissolution of p-Si in fluoride media in the presence of alkali metal cations (Hassan et al.) 211
Clay-modified electrodes
Electrodes modified with synthetic clay minerals: evidence of direct electron transfer from structural iron sites in the clay lattice (Xiang, Villemure) 21
CO
Electro-oxidation of CO and methanol on graphite-based platinum electrodes combined with oxide-supported ultrafine gold particles (Biswas et al.) 167
Colloidal
Photoelectrochemical studies of colloidal TiO_2 films: The effect of oxygen studied by photocurrent transients (Hagfeldt et al.) 39
Conducting polymers
Electrochemistry of poly(aniline-*co*-*N*-butylaniline) copolymer: comparison with polyaniline and poly(*N*-butylaniline) (Ye et al.) 71
Corrosion rate
Differences between apparent polarization resistance values obtained in the time and frequency domains (Feliu et al.) 1
Current–potential curves
Ohmic distortion of current–potential curves at wall-jet electrodes (Coles et al.) 99
Cyclic voltammetry
Surface characterization of thin-film platinum electrodes for biosensors by means of cyclic voltammetry and laser SNMS (Aschauer et al.) 143
Cyclic voltammogram
Cyclic voltammogram of Rh(100), Pt-deposited Rh(100) and chemically reconstructed Pt/Rh(100) surfaces (Tamura et al.) 95
Cytochrome *c*
Promoter effect of halogen anions on the direct electrochemical reaction of cytochrome *c* at gold electrodes (Qu et al.) 81

Decolorization
Rapid chemical decolorization reaction of H_xWO_3 thin films and reversible operation of photochromism of WO_3 (Kikuchi et al.) 15
Dielectric relaxation
Design of a potentiostat suitable for dielectric relaxation measurements (Lim, VanderNoot) 221

Digital etching
Electrochemical digital etching in non-corrosive electrolyte: $I_{(ads)}$-catalyzed dissolution and reordering of ion-bombarded Pd(111) (Abreu et al.) 239
Direct electron transfer
Electrodes modified with synthetic clay minerals: evidence of direct electron transfer from structural iron sites in the clay lattice (Xiang, Villemure) 21
Dropping mercury electrode
Temperature dependence of the transfer coefficient for the hydrogen evolution reaction on the DME (Kirowa-Eisner et al.) 29

Electrocatalysis
Electrocatalysis by polyoxometalate|polymer systems: reduction of nitrite and nitric oxide (Keita et al.) 243
Electrochemical immobilization
Electrochemical immobilization of enzymes on conducting organic salt electrodes: preparation of an oxygen independent and interference-free glucose biosensor (Palmisano et al.) 235
Electrochemical stability
Electrochemistry of poly(aniline-*co*-*N*-butylaniline) copolymer: comparison with polyaniline and poly(*N*-butylaniline) (Ye et al.) 71
Electrodeposition
The influence of the solvent on the kinetics of silver electrodeposition (Titova et al.) 227
Electron transfer mediators
Bioelectrocatalytic hydroxylation of nicotinic acid at an electrode modified with immobilized bacterial cells of *Pseudomonas fluorescens* in the presence of electron transfer mediators (Takayama et al.) 47
Electron transfer promotor
Promoter effect of halogen anions on the direct electrochemical reaction of cytochrome *c* at gold electrodes (Qu et al.) 81
Electro-oxidation
Electro-oxidation of CO and methanol on graphite-based platinum electrodes combined with oxide-supported ultrafine gold particles (Biswas et al.) 167
Electro-oxidation of tetra(terthienyl)silanes: towards 3D electroactive π-conjugated systems (Roncali et al.) 257
Electroreduction
Electroreduction of the Schiff base of pyridoxal-5′-phosphate and hexylamine in dimethylformamide and methanol. Effect of the self-protonation (Sevilla et al.) 179
Enzyme electrode
Kinetic analysis of the enzyme electrode composed of GOx adsorbed on an alkanethiol SAM modified Pt surface (Dong et al.) 195
Expanded porphycenes
Redox properties of novel tetrapyrroles: expanded porphycenes (Bernard et al.) 159

Ferrocene
Determination of kinetic parameters of 1,1′-diacylferrocene at a gold microdisc electrode (Jun et al.) 231
Ferrocene derivatives
Adsorption behavior of functionalized ferrocenylalkane thiols and disulfide onto Au and ITO and electrochemical properties of modified electrodes: effects of acyl and alkyl groups attached to the ferrocene ring (Kondo et al.) 203
Flame annealing
In-situ scanning tunneling microscopy of well-ordered Rh(111) electrodes (Wan et al.) 105
Flatband potential
Potential-modulation-induced microwave reflectivity measurements on silicon in fluoride solutions (Schlichthörl, Peter) 55
Fluorescent ions
Potential-step chronofluorometric response of fluorescent-ion transfer across a liquid|liquid interface (Kakiuchi, Takasu) 5
Fluoride solutions
Potential-modulation-induced microwave reflectivity measurements on silicon in fluoride solutions (Schlichthörl, Peter) 55
Frequency domain measurement
Differences between apparent polarization resistance values obtained in the time and frequency domains (Feliu et al.) 1
Fuel cells
Electro-oxidation of CO and methanol on graphite-based platinum electrodes combined with oxide-supported ultrafine gold particles (Biswas et al.) 167

Glucose biosensor
Electrochemical immobilization of enzymes on conducting organic salt electrodes: preparation of an oxygen independent and interference-free glucose biosensor (Palmisano et al.) 235
Glucose oxidase
Kinetic analysis of the enzyme electrode composed of GOx adsorbed on an alkanethiol SAM modified Pt surface (Dong et al.) 195
Glutathione
In situ reactivity of the electrochemically generated nitro radical anion from nitrendipine with glutathione, adenine and uracil (Núñez-Vergara et al.) 215
Gold electrodes
Promoter effect of halogen anions on the direct electrochemical reaction of cytochrome *c* at gold electrodes (Qu et al.) 81

Halogen anions
Promoter effect of halogen anions on the direct electrochemical reaction of cytochrome *c* at gold electrodes (Qu et al.) 81
Hexylamine
Electroreduction of the Schiff base of pyridoxal-5′-phosphate and hexylamine in dimethylformamide and methanol. Effect of the self-protonation (Sevilla et al.) 179
H_2SO_4 solutions
Transpassivity of molybdenum in H_2SO_4 solution (Bojinov et al.) 123
Hydrogen evolution reaction
Temperature dependence of the transfer coefficient for the hydrogen evolution reaction on the DME (Kirowa-Eisner et al.) 29
Hydroxylation
Bioelectrocatalytic hydroxylation of nicotinic acid at an electrode modified with immobilized bacterial cells of *Pseudomonas fluorescens* in the presence of electron transfer mediators (Takayama et al.) 47

Impedance
Potential-modulation-induced microwave reflectivity measurements on silicon in fluoride solutions (Schlichthörl, Peter) 55
Impedance spectroscopy
Electrochemistry of poly(aniline-*co*-*N*-butylaniline) copolymer: comparison with polyaniline and poly(*N*-butylaniline) (Ye et al.) 71
Impinging jet method
Voltammetric and impinging jet study of the behaviour of rhodized electrodes in acidic perchlorate solutions (Wasberg, Horányi) 151
Indium tin oxide
Adsorption behavior of functionalized ferrocenylalkane thiols and disulfide onto Au and ITO and electrochemical properties of modified electrodes: effects of acyl and alkyl groups attached to the ferrocene ring (Kondo et al.) 203

Interfacial chemistry
Potential-step chronofluorometric response of fluorescent-ion transfer across a liquid|liquid interface (Kakiuchi, Takasu) 5
Ion transfer
Potential-step chronofluorometric response of fluorescent-ion transfer across a liquid|liquid interface (Kakiuchi, Takasu) 5
Iridium single crystal electrodes
Atomic arrangement dependence of reduction rates of carbon dioxide on iridium single crystal electrodes (Hoshi et al.) 261
Iron sites
Electrodes modified with synthetic clay minerals: evidence of direct electron transfer from structural iron sites in the clay lattice (Xiang, Villemure) 21
Ising model
Statistical mechanics of polynuclear ring complexes with mixed-valence states by use of the Ising model (Aoki) 185
Isomeric dicarboxylic anions
Effect of isomeric dicarboxylic anions on the reconstruction phenomena of Au(100) (Skoluda) 265
ITIES
Potential-step chronofluorometric response of fluorescent-ion transfer across a liquid|liquid interface (Kakiuchi, Takasu) 5

Kinetic parameters
Determination of kinetic parameters of 1,1′-diacylferrocene at a gold microdisc electrode (Jun et al.) 231

Mass spectroscopy
Surface characterization of thin-film platinum electrodes for biosensors by means of cyclic voltammetry and laser SNMS (Aschauer et al.) 143
Mean field model
Charge propagation in $[Os(bpy)_2(PVP)_xCl]Cl$ polymers. An example of mean field behavior in a system with constrained diffusion of redox sites? (Larsson, Sharp) 133
Mercury electrode
Calculation of outer Helmholtz potential at mercury as a function of temperature and concentration of aqueous sodium fluoride solutions (Kirowa-Eisner et al.) 11
Methanol
Electro-oxidation of CO and methanol on graphite-based platinum electrodes combined with oxide-supported ultrafine gold particles (Biswas et al.) 167
Microdisc electrode
Determination of kinetic parameters of 1,1′-diacylferrocene at a gold microdisc electrode (Jun et al.) 231
Microelectrodes
The application of microelectrodes to the study of photochemical reactions (Compton et al.) 87
Microwave reflectivity
Potential-modulation-induced microwave reflectivity measurements on silicon in fluoride solutions (Schlichthörl, Peter) 55
Mixed-valence states
Statistical mechanics of polynuclear ring complexes with mixed-valence states by use of the Ising model (Aoki) 185
Modified electrodes
Adsorption behavior of functionalized ferrocenylalkane thiols and disulfide onto Au and ITO and electrochemical properties of modified electrodes: effects of acyl and alkyl groups attached to the ferrocene ring (Kondo et al.) 203
Molybdenum
Transpassivity of molybdenum in H_2SO_4 solution (Bojinov et al.) 123

Nanocrystalline
Photoelectrochemical studies of colloidal TiO_2 films: The effect of oxygen studied by photocurrent transients (Hagfeldt et al.) 39
Nicotinic acid
Bioelectrocatalytic hydroxylation of nicotinic acid at an electrode modified with immobilized bacterial cells of *Pseudomonas fluorescens* in the presence of electron transfer mediators (Takayama et al.) 47
Nitrendipine
In situ reactivity of the electrochemically generated nitro radical anion from nitrendipine with glutathione, adenine and uracil (Núñez-Vergara et al.) 215
Nitro radical anion
In situ reactivity of the electrochemically generated nitro radical anion from nitrendipine with glutathione, adenine and uracil (Núñez-Vergara et al.) 215
Non-corrosive electrolyte
Electrochemical digital etching in non-corrosive electrolyte: $I_{(ads)}$-catalyzed dissolution and reordering of ion-bombarded Pd(111) (Abreu et al.) 239

Ohmic distortion
Ohmic distortion of current–potential curves at wall-jet electrodes (Coles et al.) 99
Outer helmholtz potential
Calculation of outer Helmholtz potential at mercury as a function of temperature and concentration of aqueous sodium fluoride solutions (Kirowa-Eisner et al.) 11

Pd electrode
Electrochemical digital etching in non-corrosive electrolyte: $I_{(ads)}$-catalyzed dissolution and reordering of ion-bombarded Pd(111) (Abreu et al.) 239
Perchloric acid
Voltammetric and impinging jet study of the behaviour of rhodized electrodes in acidic perchlorate solutions (Wasberg, Horányi) 151
Photochemical reactions
The application of microelectrodes to the study of photochemical reactions (Compton et al.) 87
Photochromism
Rapid chemical decolorization reaction of H_xWO_3 thin films and reversible operation of photochromism of WO_3 (Kikuchi et al.) 15
Photocurrent transients
Photoelectrochemical studies of colloidal TiO_2 films: The effect of oxygen studied by photocurrent transients (Hagfeldt et al.) 39
Photoelectrochemistry
Photoelectrochemical studies of colloidal TiO_2 films: The effect of oxygen studied by photocurrent transients (Hagfeldt et al.) 39
Polarization resistance
Differences between apparent polarization resistance values obtained in the time and frequency domains (Feliu et al.) 1
Polynuclear ring complexes
Statistical mechanics of polynuclear ring complexes with mixed-valence states by use of the Ising model (Aoki) 185
Polyoxometalate
Electrocatalysis by polyoxometalate|polymer systems: reduction of nitrite and nitric oxide (Keita et al.) 243
Polyphenothiazines
Spectroelectrochemical characterization of ultra-thin films formed by electropolymerization of phenothiazine derivatives on transparent gold electrodes (Schlereth et al.) 63
Poly(thiophenes)
Electro-oxidation of tetra(terthienyl)silanes: towards 3D electroactive π-conjugated systems (Roncali et al.) 257
Potential-step chronofluorometry
Potential-step chronofluorometric response of fluorescent-ion transfer across a liquid|liquid interface (Kakiuchi, Takasu) 5

Potentiostat
Design of a potentiostat suitable for dielectric relaxation measurements (Lim, VanderNoot) 221
Pseudomonas fluorescens
Bioelectrocatalytic hydroxylation of nicotinic acid at an electrode modified with immobilized bacterial cells of *Pseudomonas fluorescens* in the presence of electron transfer mediators (Takayama et al.) 47
Pt/Rh(100)
Cyclic voltammogram of Rh(100), Pt-deposited Rh(100) and chemically reconstructed Pt/Rh(100) surfaces (Tamura et al.) 95
Pt thin-film electrodes
Surface characterization of thin-film platinum electrodes for biosensors by means of cyclic voltammetry and laser SNMS (Aschauer et al.) 143
Pyridoxal-5′-phosphate
Electroreduction of the Schiff base of pyridoxal-5′-phosphate and hexylamine in dimethylformamide and methanol. Effect of the self-protonation (Sevilla et al.) 179

Radiolysis
Radiolytic effects on the in situ investigation of buried interfaces with synchrotron X-ray techniques (Nagy, You) 275
Reaction kinetics
The influence of the solvent on the kinetics of silver electrodeposition (Titova et al.) 227
Redox polymers
Charge propagation in $[Os(bpy)_2(PVP)_xCl]Cl$ polymers. An example of mean field behavior in a system with constrained diffusion of redox sites? (Larsson, Sharp) 133
Redox potential
Adsorption behavior of functionalized ferrocenylalkane thiols and disulfide onto Au and ITO and electrochemical properties of modified electrodes: effects of acyl and alkyl groups attached to the ferrocene ring (Kondo et al.) 203
Redox properties
Redox properties of novel tetrapyrroles: expanded porphycenes (Bernard et al.) 159
Reduction
Voltammetric and impinging jet study of the behaviour of rhodized electrodes in acidic perchlorate solutions (Wasberg, Horányi) 151
Electrocatalysis by polyoxometalate|polymer systems: reduction of nitrite and nitric oxide (Keita et al.) 243
Reduction rates
Atomic arrangement dependence of reduction rates of carbon dioxide on iridium single crystal electrodes (Hoshi et al.) 261
Rh(100)
Cyclic voltammogram of Rh(100), Pt-deposited Rh(100) and chemically reconstructed Pt/Rh(100) surfaces (Tamura et al.) 95
Rh(111) electrodes
In-situ scanning tunneling microscopy of well-ordered Rh(111) electrodes (Wan et al.) 105
Rhodium
Voltammetric and impinging jet study of the behaviour of rhodized electrodes in acidic perchlorate solutions (Wasberg, Horányi) 151

Scanning tunneling microscopy
In-situ scanning tunneling microscopy of well-ordered Rh(111) electrodes (Wan et al.) 105
Schiff base
Electroreduction of the Schiff base of pyridoxal-5′-phosphate and hexylamine in dimethylformamide and methanol. Effect of the self-protonation (Sevilla et al.) 179
Self-assembled monolayer
Kinetic analysis of the enzyme electrode composed of GOx adsorbed on an alkanethiol SAM modified Pt surface (Dong et al.) 195
Self-protonation
Electroreduction of the Schiff base of pyridoxal-5′-phosphate and hexylamine in dimethylformamide and methanol. Effect of the self-protonation (Sevilla et al.) 179
p-Si
Chemical limitations to the anodic dissolution of p-Si in fluoride media in the presence of alkali metal cations (Hassan et al.) 211
Silicon
Potential-modulation-induced microwave reflectivity measurements on silicon in fluoride solutions (Schlichthörl, Peter) 55
Silver
The influence of the solvent on the kinetics of silver electrodeposition (Titova et al.) 227
Silver oxide films
In situ examination of anodic silver oxide films by EXAFS in the reflection mode (Hecht et al.) 113
Sodium fluoride
Calculation of outer Helmholtz potential at mercury as a function of temperature and concentration of aqueous sodium fluoride solutions (Kirowa-Eisner et al.) 11
Solvent effects
The influence of the solvent on the kinetics of silver electrodeposition (Titova et al.) 227
Spectroelectrochemistry
Spectroelectrochemical characterization of ultra-thin films formed by electropolymerization of phenothiazine derivatives on transparent gold electrodes (Schlereth et al.) 63
Statistical mechanics
Statistical mechanics of polynuclear ring complexes with mixed-valence states by use of the Ising model (Aoki) 185
Steady-state voltammetry
Determination of kinetic parameters of 1,1′-diacylferrocene at a gold microdisc electrode (Jun et al.) 231
Surface characterization
Surface characterization of thin-film platinum electrodes for biosensors by means of cyclic voltammetry and laser SNMS (Aschauer et al.) 143
Surface preparation
In-situ scanning tunneling microscopy of well-ordered Rh(111) electrodes (Wan et al.) 105
Synchrotron
Radiolytic effects on the in situ investigation of buried interfaces with synchrotron X-ray techniques (Nagy, You) 275
Synthetic smectite clays
Electrodes modified with synthetic clay minerals: evidence of direct electron transfer from structural iron sites in the clay lattice (Xiang, Villemure) 21

Temperature effect
Temperature dependence of the transfer coefficient for the hydrogen evolution reaction on the DME (Kirowa-Eisner et al.) 29
Tetrapyrroles
Redox properties of novel tetrapyrroles: expanded porphycenes (Bernard et al.) 159
Time domain measurement
Differences between apparent polarization resistance values obtained in the time and frequency domains (Feliu et al.) 1
Titanium dioxide
Photoelectrochemical studies of colloidal TiO_2 films: The effect of oxygen studied by photocurrent transients (Hagfeldt et al.) 39
Transfer coefficient
Temperature dependence of the transfer coefficient for the hydrogen evolution reaction on the DME (Kirowa-Eisner et al.) 29

Transparent gold electrodes
Spectroelectrochemical characterization of ultra-thin films formed by electropolymerization of phenothiazine derivatives on transparent gold electrodes (Schlereth et al.) 63
Transpassive dissolution
Transpassivity of molybdenum in H_2SO_4 solution (Bojinov et al.) 123
Tungsten oxide coloured thin films
Rapid chemical decolorization reaction of H_xWO_3 thin films and reversible operation of photochromism of WO_3 (Kikuchi et al.) 15
n-Type monocrystalline silicon
Cathodic electrodeposition of CdTe on n-type monocrystalline silicon (Sugimoto, Peter) 251

Ultrafine gold particles
Electro-oxidation of CO and methanol on graphite-based platinum electrodes combined with oxide-supported ultrafine gold particles (Biswas et al.) 167
Ultra-thin films
Spectroelectrochemical characterization of ultra-thin films formed by electropolymerization of phenothiazine derivatives on transparent gold electrodes (Schlereth et al.) 63

Under potential deposition
Cyclic voltammogram of Rh(100), Pt-deposited Rh(100) and chemically reconstructed Pt/Rh(100) surfaces (Tamura et al.) 95
Uracil
In situ reactivity of the electrochemically generated nitro radical anion from nitrendipine with glutathione, adenine and uracil (Núñez-Vergara et al.) 215

Voltammetry
The application of microelectrodes to the study of photochemical reactions (Compton et al.) 87
Voltammetric and impinging jet study of the behaviour of rhodized electrodes in acidic perchlorate solutions (Wasberg, Horányi) 151

X-ray absorption fine structure
In situ examination of anodic silver oxide films by EXAFS in the reflection mode (Hecht et al.) 113
X-ray radiation
Radiolytic effects on the in situ investigation of buried interfaces with synchrotron X-ray techniques (Nagy, You) 275
